27752 7590 08/21/2007 THE PROCTER & GAMBLE COMPANY INTELLECTUAL PROPERTY DIVISION - WEST BLDG. WINTON HILL BUSINESS CENTER - BOX 412 6250 CENTER HILL AVENUE CINCINNATI, OH 45224			EXAMINER NGUYEN, TAN D	
			ART UNIT 3629	PAPER NUMBER
			MAIL DATE 08/21/2007	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 09/808,001	Applicant(s) HUGHES ET AL.	
	Examiner Tan Dean D. Nguyen	Art Unit 3629	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 29 May 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-14 and 76 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-14 and 76 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/29/07 has been entered.

### ***Claim Status***

Claims 1-14 (method), and 76 (computer-readable media) are pending and rejected as followed.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 76 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is "computer-readable media" are merely computer program or codes and are not one of process, machine, manufacture, or composition of matter, and is therefore non-statutory. The claim needs to include after "instructions", "that, when read by a computer or processor, operate to cause a data processing apparatus to:" (a) "generating a draft technical standard" to overcome this rejection.

Art Unit: 3629

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3629

**6. Claims 1-14, and 76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant Admitted Prior Art (AAPA) in view of GRAINGER and PARKS.**

As of 5/29/07, independent method claim 1 is as followed:

1. (Currently amended) A method of developing a technical standard in the process of product development comprising:

- (a) generating a draft technical standard;
- (b) electronically circulating a document with the draft technical standard to a review group;
- (c) automatically attaching review group comments to the draft technical standard;
- (d) electronically locking a document with the draft technical standard;
- (e) electronically circulating a locked document with the locked-draft technical standard to an approval group, the approval group members having access to the review group comments;
- (f) collecting electronic approvals from each member of the approval group;
- (g) rendering a locked document with the draft technical standard unchangeable once each member of the approval group has electronically approved of the draft technical standard; and
- (h) releasing a document with the rendered technical standard for electronic access.

Note: for convenience, letters (a)-(h) are added to the beginning of each step.

**As for independent method<sup>1</sup> claim 1, AAPA**, as shown on pages 1-2 of the specification, "Background Art", fairly discloses a method of developing a technical standard in the process of product development comprising:

- (a) generating a document containing information about a draft technical standard (specifications);
- (b) electronically circulating the document containing draft technical standard (specifications) to a review group.
- (c ) electronically attaching comments (information) to the document containing draft technical standard (specification) from the reviewing group;
- (e) electronically circulating the document containing standard (specifications);
- (f) collecting electronic approvals from each member of the approval group, and
- (h) releasing the rendered technical standard (specifications) for electronic access.

AAPA teaches the claimed invention except for (1) carrying step (c ) automatically, (2) step (d), and (3) step (g).

In another similar process for electronic workflow processing using the Internet including automatically managing electronic documents related to application such as reviewing a draft application by generating the draft application, circulating the draft for reviewing and editing, adding comments to the draft, editing the draft, and coordinating, tracking, and approving the draft document, [see 0015, 0016, 0026-0039], **GRAINGER** discloses the use of Internet or web pages for global access for circulation of draft document for review and comment comprising carrying out steps of (a) –(c)

automatically and electronically locking the document at the end of the process so they cannot be subsequently altered {see [0027-0032, 0070, especially 0129]}. GRAINGER also teaches the step of (c.) attaching the comments, messages, attachments, etc. to the electronic document (web page) {see 0096, 0129, Fig. 26, 252}. It would have been obvious to modify the teachings of AAPA by converting the manual and sporadic electronic workflow processing to automatic workflow pipeline with every step in the process to be executed from a computer desktop, slashing administrative costs and processing time for completing the project {see GRAINGER [0027]}.

The teachings of AAPA /GRAINGER fails to teach:

2) step (d) of electronically locking the standard (specifications) after step (c.);  
and

(g) rendering the technical standard (specification) unchangeable once each member of the approval group has electronically approved.

In another similar process for processing electronic documents with respect to development of an information/ideas such as news story information, **PARKS** discloses several document monitoring features such as (d) electronically locking the document with information (news story) for the purpose of restricting access to the document to only authorized user, and (g) rendering the document unchangeable (or “read-only” or “RO” attribute) to override the “read-write” access attribute or preventing modification or editing of the document {see PARKS Fig. 3B (323 “LOCKED”), FORM (341), “RO” (344), col. 9, line 63 to col. 10, lines 1-5, especially col. 11, lines 29-34. Since it’s well known in the document management or project management that a few number of

people approve the draft documentation after it has been reviewed, it would have been obvious to a skilled artisan to modify the teachings of (a)-(c.) of AAPA/GRAINGER by carrying out step (d) as taught by PARKS for the purpose of restricting the access of the review document to a certain critical group of selected people, for example, approval group. Note that the selection of certain group for access is well known parameters in managing electronic document and would have been obvious to a skilled artisan to select the desired circulation group. Also, it would have been obvious to modify the teachings of AAPA by including step (g) as taught by PARKS to render the electronic document unchangeable once it has been approved or final document has been reviewed for access.

**As for dep. claim 2** (part of 1), which deals with draft generating parameters, i.e. text-based document being captured electronically, this is taught in AAPA page 2, 1<sup>st</sup> paragraph, see "computer automation ....., document development, electronic distribution". Moreover, this is also taught in GRAINGER [0048, 0027] or PARKS Figs. 2A or 2B.

**As for dep. claim 3** (part of 1), which deals with draft generating parameters, i.e. searching it using other data-structured attributes, this is fairly taught in AAPA, page 1, lines 14-15 wherein "this draft is created by modifying an existing standard" which normally requires or inherently includes some searching using similar data attributes. Moreover, this is non-essential to the scope of the claimed invention which deals with reviewing and approving the draft electronically, and is fairly taught in GRAINGER [0071] or PARKS Figs. 3B, 3C.

**As for dep. claim 4** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. tracking status of reviewing and approval, this is fairly taught in GRAINGER in [0010, 0052, 0067, 69] and in view of AAPA/GRAINGER. The selection of other desired or similar variables for tracking is within the skill of the artisan.

**As for dep. claim 5** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. electronically notifying specified user upon approval, this is fairly taught in AAPA page 1, lines 16-17, page 2, lines 3-4, or GRAINGER on [0038, 0096, 0130].

**As for dep. claim 6** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. storing the standard in a globally accessible database, this is taught in GRAINGER on Fig. 2, 100, 101, 102, 106 (database).

**As for dep. claims 7-9** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. limiting access of the standard based on user authorization and approval, these are fairly taught in GRAINGER on [0061, 0129, 0142].

**As for dep. claim 10** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. modifying, incrementing new version, circulating, etc., these are fairly taught in GRAINGER on [0129-0130 "new version"].

**As for dep. claim 11** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. translating the standard to proper language for reviewing and communication, is non-essential to the scope of the claimed invention which deals with reviewing and approving the draft electronically and would have been obvious to a

skilled artisan as routine works to convert the language of the draft to appropriate language for reviewing and approving by the groups.

**As for dep. claim 12** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. attaching additional reviewing and commenting information in the form of documentations or other, this is fairly taught by GRAINGER on Fig. 6, 254, 256, or [0061].

**As for dep. claim 13** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. printing the approved document with watermark including the printing date, this is non-essential to the scope of the claimed invention which deals with reviewing and approving the draft electronically, and is fairly taught by AAPA on page 1, lines 15-17. Moreover, it would have been obvious to a skilled artisan to do so if printed document or paper with effective date of approved is desired.

**As for dep. claim 14** (part of 1), which deals with well known draft reviewing and approving parameters, i.e. storing the approved document, this is fairly taught by GRAINGER on Fig. 2, 100, or [0042, 0130].

**As for independent apparatus<sup>1</sup> claim 15**, which is the apparatus to carry out the scope of method claim 1 above, it's rejected over the elements to carry out the method steps of claim 1 as cited above or over the same rejections using AAPA in view of GRAINGER as cited in claim 1 above.

**As for dep. claim 16** (part of 15), which deals with draft generating parameters, i.e. by copying existing/approved standard, this is taught in AAPA/GRAINGER in view of the teaching of AAPA on page 1, lines 15 "may be created or formed by modifying an

Art Unit: 3629

existing standard” which normally requires a copying step followed by modifying step. The setting up of sufficient database and module to carry out these steps are within the skilled artisan and would have been obvious.

**As for dep. claims 17-26** (part of 15), which have the same limitations as in dep. claims 2, 3, 5, 7, 8, 9, 10, 11, 12 and 13 respectively, they are rejected for the same reasons set forth in dep. claims 2, 3, 5, 7, 8, 9, 10, 11, 12 and 13 above.

**As for independent product<sup>1</sup> claim 76**, which is the computer-readable media having computer-readable instructions for performing the method of claim 1 above, it's rejected over the computer-readable media of AAPA in view of GRAINGER for performing the method as cited in claim 1 above.

**7. Claims 1-14, 15-26, 76 are rejected (2<sup>nd</sup>) under 35 U.S.C. 103(a) as being unpatentable over Applicant Admitted Prior Art (AAPA) in view of GRAINGER, PARKS and JEFFERY et al.**

**As for independent method<sup>1</sup> claim 1**, the teachings of AAPA / GRAINGER /PARKS are cited above.

In a similar electronic workflow pipeline or electronic document management system, JEFFERY et al is cited to teach the automatic attachment of comment/attachment to a draft document, “document & attachments”, for further communication and “EDIT” function in the heading region to allow editing capabilities to alter information in the document {see col. 13, lines 47-67, col. 14, lines 1-7, Fig. 26}. It would have been obvious to modify the teachings of AAPA /GRAINGER /PARKS by

including feature for attaching comment to the document as taught by JEFFERY et al above for further communication or allowing editing capabilities.

As for claims 2-14, 15-26, and 76, they are rejected for the same reasons set forth above and further in view of JEFFERY et al as cited in claim 1 above.

***Response to Arguments***

8. Applicant's arguments filed 5/29/07 have been fully considered but they are not persuasive.

(1) In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). Applicant's comment that Grainger teaches the "saves and locks all documents" and there is no teaching of "unlock able" later on is not persuasive in view of the rejections cited above.

(2) Applicant's fail to identify the proper reference of Parks which discloses the critical teachings of Parks to the claimed invention as indicated above which leads to improper allegation about the rejections. The Parks reference is attached on the 892.

No claims are allowed.

Art Unit: 3629

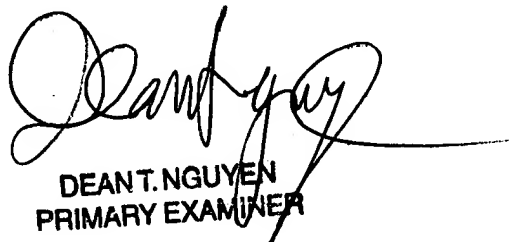

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through private PAIR only. For more information about the PAIR system, see <http://pair-direct@uspto.gov>. Should you have any questions on access to the private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll free).

In receiving an Office Action, it becomes apparent that certain documents are missing, e. g. copies of references, Forms PTO 1449, PTO-892, etc., requests for copies should be directed to Tech Center 3600 Customer Service at (571) 272-3600, or e-mail [CustomerService3600@uspto.gov](mailto:CustomerService3600@uspto.gov).

Any inquiry concerning the merits of the examination of the application should be directed to Dean Tan Nguyen at telephone number (571) 272-6806. My work schedule is normally Monday through Friday from 6:30 am - 4:00 pm. I am scheduled to be off every other Friday.

Should I be unavailable during my normal working hours, my supervisor John Weiss may be reached at (571) 272-6812. The FAX phone numbers for formal communications concerning this application are (703) 872-9306. My personal Fax is (571) 273-6806. Informal communications may be made, following a telephone call to the examiner, by an informal FAX number to be given.
